

NuCypher KMS: Decentralized Key-Management System

Michael Egorov, CTO

ETHDenver, 17 Feb 2018

Why

Encrypted file sharing

Why

Encrypted multi-user chats

Why

Decentralized Netflix

Central server + TLS

Data vulnerable to hackers, state actors etc

Solution

Proxy re-encryption + decentralization

What is proxy re-encryption (PRE)

Centralized KMS using PRE

Encryption

Centralized KMS using PRE

Access delegation

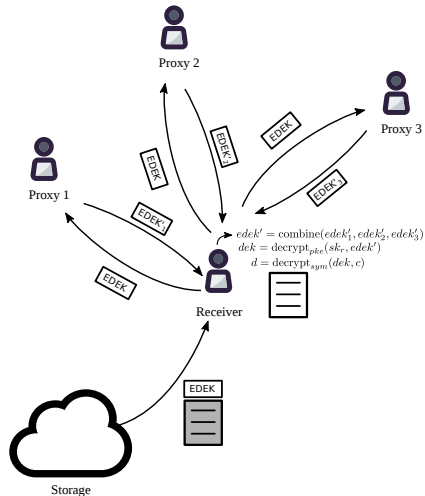

Centralized KMS using PRE

Decryption

Decentralized key management

Using threshold split-key re-encryption (Umbral)

<https://github.com/nucypher/nucypher-kms/>

Umbral: Threshold Proxy Re-Encryption

- “Umbral” is Spanish for “threshold”
- PRE properties: Unidirectional, single-hop, non-interactive
- It follows a KEM/DEM approach:
 - ▶ UmbralKEM provides the threshold re-encryption capability
 - ▶ The DEM can be any authenticated encryption (currently ChaCha20-Poly1305)
- IND-PRE-CCA security
- Verification of re-encryption correctness through Non-Interactive ZK Proofs of Knowledge
- Code: <https://github.com/nucypher/pyUmbral/>
- Documentation (WIP): <https://github.com/nucypher/umbral-doc>

PRE demo

KMS token

Purpose

- Splitting trust between re-encryption nodes (more tokens = more trust and more work);
- Proof of Stake for minting new coins according to the mining schedule;
- Security deposit to be at stake against malicious behavior of nodes

KMS token

Mining

Mining reward:

$$\text{reward} = \frac{\text{locked_tokens} \times \text{reward_rate}}{\sum_{\text{all miners}} \text{locked_tokens}} + \sum_{\text{this miner}} \text{miner_fees}$$

Usage examples

Decentralized marketplaces:

- Datum.

Decentralized databases:

- Bluzelle;
- Fluence;
- Wolk.

Medical data sharing

- Medibloc;
- IRYO;
- Medixain;
- Wholesome.

IoT

- Spherity (together with BigchainDB).

Cryptocurrency keys

- Coval Emblem Vault

KMS mock code demo
